**Subject:** Microsoft Settlement

Please do not allow Microsoft to continue to flaunt the laws protecting consumers.

Microsoft is unlawfully using it's monopoly to avoid competition, (overwriting suffix links, avoiding the dual boot).

It is clear to me that Microsoft will use every tool, unethically and unlawfully to dominate every market it enters.

I feel that any claims of standardization and market cohesion are misleading, and simply rewrite history from the view the monopoly strangling any alternatives.

The proposed settlement is a clear example of using the legal wrangling to force-feed Microsoft products into the schools regardless of existing needs or educational value.

Microsoft does not deserve the overarching market position it has brutally acquired, I think we would all be better served if the Anti-trust laws were applied to the robber barons of the information age.
